

Dear Friends and Colleagues,

Having spent years on the clinical floor before moving into LTC leadership, I know firsthand the weight our clinicians and care directors carry every day. You didn't choose residential care to be wading through hospital charts at 7:00 PM, hunting down missing FL-2s, or having uncomfortable price conversations with families because a care need was missed during intake.

That's why we built Clinware Admissions™ for Assisted Living – a brand-new platform designed specifically for ALF teams.

Our goal is to help take that administrative burden off your team's shoulders, ensure residents get the exact support they need from day one, and give you your time back.

- **Fast Clinical Clearances:** Automatically scans hospital records in minutes so your clinical team can safely approve move-ins without taking on unmanaged acuity.
- **Accurate Acuity & Pricing:** Captures true ADL and behavioral needs upfront to set exact care levels, reducing pricing friction with families after move-in.
- **Less Manual Data Entry:** Tracks required state forms (TB, FL-2) and feeds data straight into PointClickCare, eliminating double-typing so care plans and orders are active immediately.

When we give clinicians tools that respect their time, our teams stay longer, our care improves, and our communities thrive. You can learn more about us and our Assisted Living platform on our website.

We're so grateful for the opportunity to serve you and your teams.

Warmly,

Cory Evans

CEO & Founder, Clinware
